A note from Miss McNicholas

Good afternoon,

Another great week at SMC!

A special thank you to all our amazing year 2 parents who gave up their time and came into school to learn about their children's learning and expectations for this forthcoming year. You asked so many important questions! Thanks again for your time.

Please remember that Mrs Adams is holding a meeting on Monday 18th September at 9:10am for all Reception parents. Mrs Adams will have a home learning pack for parents and you will be provided with ideas of activities and work that you can complete at home, so that you can fully support your child in the early stages of their learning journey.

On Thursday, Mrs Kelly and I had the opportunity to take some of our missionaries to St Mary's Cathedral to visit the National Virgin Pilgrim Statue and the relics of St Jacinta and St Francisco.

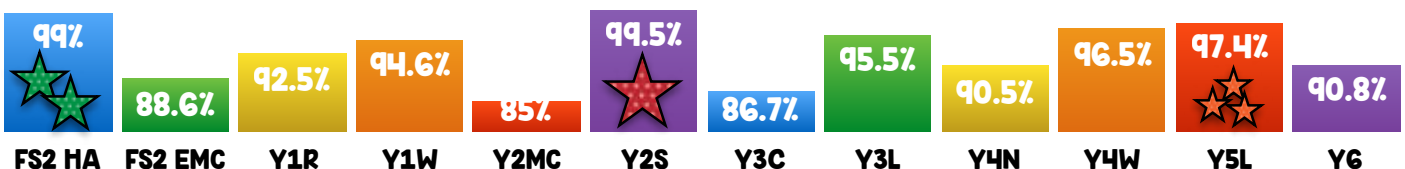

May 13th 2017 marks the 100th anniversary of the apparitions of Mary to three shepherd children in Fatima, Portugal. Mary appeared to Jacinta, Francisco and Lucia on the penance for the sake of the world, which was witnessing the atrocities of the First World War. The children heard Mary them about worse atrocities to come, but she told them to trust in the victory of her Immaculate Heart. The messages of Fatima were a great gift to the world in the twentieth century and they continue to guide and inspire the Church today.

Father McLoughlin joined us during our visit.

Have a lovely weekend everyone.

Attendance % by CLASS...

We would be very grateful if you could make sure your child has a water bottle for school. As always, these can be taken home at the end of each week for a thorough clean. Let's not share germs this season - use your own water bottle.

Water and **Brain** Energy. The **brain** is one of the most important organs in your body to keep fuelled. It is approximately 85 percent **water** and **brain** function depends on having abundant access to **water**. **Water** gives the **brain** the electrical energy for all **brain** functions, including thought and memory processes.
